Profil

Fourth-year computer engineering student specializing in Mobile Information Systems, driven by a passion for building performant mobile apps that incorporate AI and machine learning. I will bring a motivated beginner's hands-on approach to mobile development, contributing to native iOS/Android and cross-platform projects while learning quickly on the job.

Work experience

Full-Stack Mobile Developer

From June 2025 to August 2025 Codingaholic Tunis, TU, Tunisia

Full development of the social mobile application *PlanninGo*.
Implementation of authentication, real-time messaging, and geolocation features.
Backend design using Node.js (Express.js) with MongoDB database management.
API deployment and testing using Postman.

Database Management

From July 2023 to August 2023 STEG Tunisie Ariana

Database performance optimization, bug fixing, and documentation of maintenance procedures.

Academic Projects

Software Engineer

Since 2022 Esprit Ariana Governorate, Tunisia

Application Mobile AI | MOVIQ — Smart Movie Discovery Platform
Technologies: iOS (SwiftUI, MVVM), Android (Kotlin, Jetpack Compose), NestJS (TypeScript), MongoDB, Redis, WebSockets, Socket.IO, OAuth2, JWT, Docker, Fly.io, GitHub Actions, Google Gemini, Google Cloud Vision, Face++, OpenAI
Role: Native mobile development (iOS & Android), full-stack backend, AI integration and deployment
Objective: Create an intelligent movie discovery platform combining AI recommendations, visual recognition, and real-time community interaction.

Application Mobile Social | PlanninGo
Technologies: Flutter, Node.js (Express.js), MongoDB, Firebase Cloud Messaging (FCM), Socket.IO, Geolocator, OpenStreetMap API, Table_Calendar, SharedPreferences, Render, Postman, GitHub
Role: Full-stack development
Objective: Connect users based on their interests, with real-time messaging, personalized suggestions, and automatic generation of weekend programs.

Application Mobile | E-commerce
Technologies: FlutterFlow, Firebase, GitHub
Role: User and product management
Objective: Develop an ergonomic mobile application facilitating online purchasing and product management.

Application Web & Desktop | Human Resources Platform
Technologies: Symfony 7, PHP, JavaScript, CSS, Bootstrap, Twig, HTML5, JavaFX, Java, GitHub
Role: Resource and reservation management
Objective: Optimize human resource management and automate internal reservations.

Application Desktop | Physiotherapy Center
Technologies: QtCreator, C++, Oracle, Figma, Arduino IDE, Arduino, GitHub
Role: Appointment management
Objective: Automating appointment management to improve patient experience and optimize center operations.

25 years old

Open to remote work

Education

High School Diploma in Technical Sciences

From September 2017 to June 2021 — Lycée technique Kef

Computer and Telecommunications Engineering

Since September 2022 — ESPRIT – Private Higher School of Engineering and Technologies Ariana, Tunisia

Languages

English
B2

French
B2

Native Language

Spanish
Entry-level

Interests

Sports: Tennis, Padel
Hobbies: Photography, Hiking
Technology Interests: Artificial Intelligence, Mobile Development

Soft Skills

Teamwork | Problem Solving | Autonomy | Adaptability

Skills

Mobile: Swift (SwiftUI), Kotlin (Jetpack Compose), Flutter, FlutterFlow, CI/CD for mobile apps, Automated testing and QA for mobile apps, Mobile UI/UX design
Back-end: TypeScript (NestJS), Node.js (Express), PHP (Symfony), Java (Spring Boot), .NET, RESTful APIs and integration
Front-end: NextJS, Bootstrap, Twig, CSS3, JavaScript (ES6)
Databases: MongoDB, Redis, MySQL, Oracle, Firebase
Tools & Technologies:
DevOps: Docker, GitHub Actions, Fly.io
Real-time: Socket.IO, WebSockets
Security: OAuth2, JWT
Tools: GitHub, Postman, Swagger, Linux, Windows, MacOS
Design: Figma, Adobe Suite
Electronics: Arduino
